

# Roadway Improvement Project

## Hunkins Pond Road - Phase I Sanbornton Y Project Sanbornton, NH

Hunkins Pond Road is the major east-west corridor for the Town of Sanbornton, linking the Lake Winnisquam resort area with Interstate I-93 and serving as the major commuting route for the residents and vacationers. The roadway is owned and maintained by the New Hampshire Department of Transportation, with winter maintenance being the responsibility of the Town.

A major portion of the roadway, approximately 8300 LF, had severely deteriorated over time, lacked adequate roadside drainage, and exhibited completely failed pavement structure in several areas. The roadway was approved for inclusion on the NHDOT Municipally Managed State Highway Aid Program.

Due to the extremely deteriorated condition of a 1500 LF foot section, QCC as a subconsultant to The H.L. Turner Group Inc., acted under emergency measures to evaluate the roadway, development a rehabilitation program and prepare construction documents for construction to occur in late fall of 2006. This program included new roadside drainage swales, underdrains, cross culverts, rehabilitation of the roadway and new pavement.
