

# Capital Improvement Planning

## Roadway Capital Improvement Plan 11 Municipal Gravel Roadways Northfield, NH

The Town of Northfield has over 43 miles of roadway to maintain, including 8 miles of gravel surfaced roads.

In 2012, the Town of Northfield requested that QCC assist the Town Highway Department in assessing and developing project budgets for a total of eleven gravel surfaced municipal roadways for use in the development of a ten-year transportation improvement plan. QCC performed a preliminary assessment of deficiencies, provided recommendations for repairs and improvements, and prepared project budget estimates for engineering, permitting, and construction costs in present day dollars for each roadway.

QCC has been assisting the Town of Northfield with capital improvement planning on roadways and bridges since 2005.
